

QUICKCIRCUITS

...understanding the importance of precision

PCB Manufacturer & Assembler

In the same facility,
under the same roof,
by the same company.

PCB Assembly Capabilities

- ISO9001
- IPC Class 3
- Functional testing
- X-ray inspection
- First article electronic comparison inspection
- A.O.I. inspection
- Ersascope BGA inspection
- High clarity high magnification optical inspection
- Full ESD controlled facility
- RoHS & non-RoHS assembly
- Full or partial procurement
- Stock holding of a wide range of passive components
- Full traceability to component level (*upon request*)
- Mechanical assembly - cable, wiring, looms and box build
- Conventional through-hole assembly
- Pick and place component handling from 0201 and μ BGA's
- Low to high technology
- Specialising in prototype/small to medium batch sizes
- Extremely rapid build to compliment in-house quick turn PCB manufacture
