

Counterfeit Component Policy Statement

At Quick Circuits, we understand that product quality is the cornerstone to success in our industry and fundamental to the needs of our customers. Therefore, we feel it is our duty to ensure that we have stringent policies and strict processes to protect our valuable reputation and that of our customers.

Quick Circuits purchase components directly from:

- Manufacturers
- Manufacturers' Approved Franchise Distributor
- Manufacturers' Approved Agent or Representative
- OEM/CEM Bonded Inventories

Quick Circuits continuously monitors the performance of its Approved Component Suppliers utilising a variety of criteria, continuously updating with the latest secure trends and industry best practices. Quick Circuits has processes in place with its vendors to qualify components and provide the following approvals: Certificate of Conformity, Certificate of Compliance and Certificate of Origin.

Quick Circuits recognises counterfeit components affect our relationship and credibility with our customers; however, certain hard-to-find or obsolete products cannot always be obtained from our primary sources. In these instances, Quick Circuits will procure from sources that provide the least risk. It may be necessary to source components through brokers or independent distributors, verified by our approved vendors and subject to our clients' approval.

A list of Quick Circuits approved suppliers is available upon request.
